Launch ≈ 0.6 s
(timed: time to first display)
Profilers start
(t = 0)
First scenario
starts
Last scenario
ends
Fresh install
before every run
Passive phase
≈ 29 s
Active phase
≈ 113 s (95–133 s by application)
Launch phase (not measured in energy):
the harness starts the profilers, ≈ 7 s
Appium connects (≈ 2.5 s) and sends the launch intent
again (≈ 3.8 s; five of the eight apps of the passive phase); no new process
